PROFILE

I am a Toronto-based front-end web developer and I make beautiful, accessible, and user-friendly websites. I enjoy creating clean, DRY, easy to read code and ensure I live up to my highest potential.

SKILLS

- JavaScript, jQuery
- Responsive design, website accessibility
- HTML5, CSS3, Sass, Bootstrap
- React, Firebase
- Working with REST API's
- Git and Github
- VS Code, Snippets, and Emmet
- Project scope management
- Best practices for modern web development
- Paired programming and team-based development

EXPERIENCE

Student

HackerYou College of Technology | 2019

Projects:

Canadian Fact Generator

- jQuery app that captures user input and displays relevant Canadian fact after querying in-memory data
- Responsive and accessible web app

PSD To Static Website

- Hands-on HTML/CSS, Sass, JavaScript based multi-page website developed based on given PSD
- Responsive and accessible with navigation menu

Picture of the Day

- Consumed NASA API and used AJAX to generate picture of requested day
- Created with jQuery and paired programming

React Project - #lifeGoals

- React and Firebase Web App that takes user input and stores into a real-time database
- Using state, and the React DOM, the data is retrieved and displays on the page in a neatly formatted way
